PORTFOLIO

OUR

PHILOSOPHY

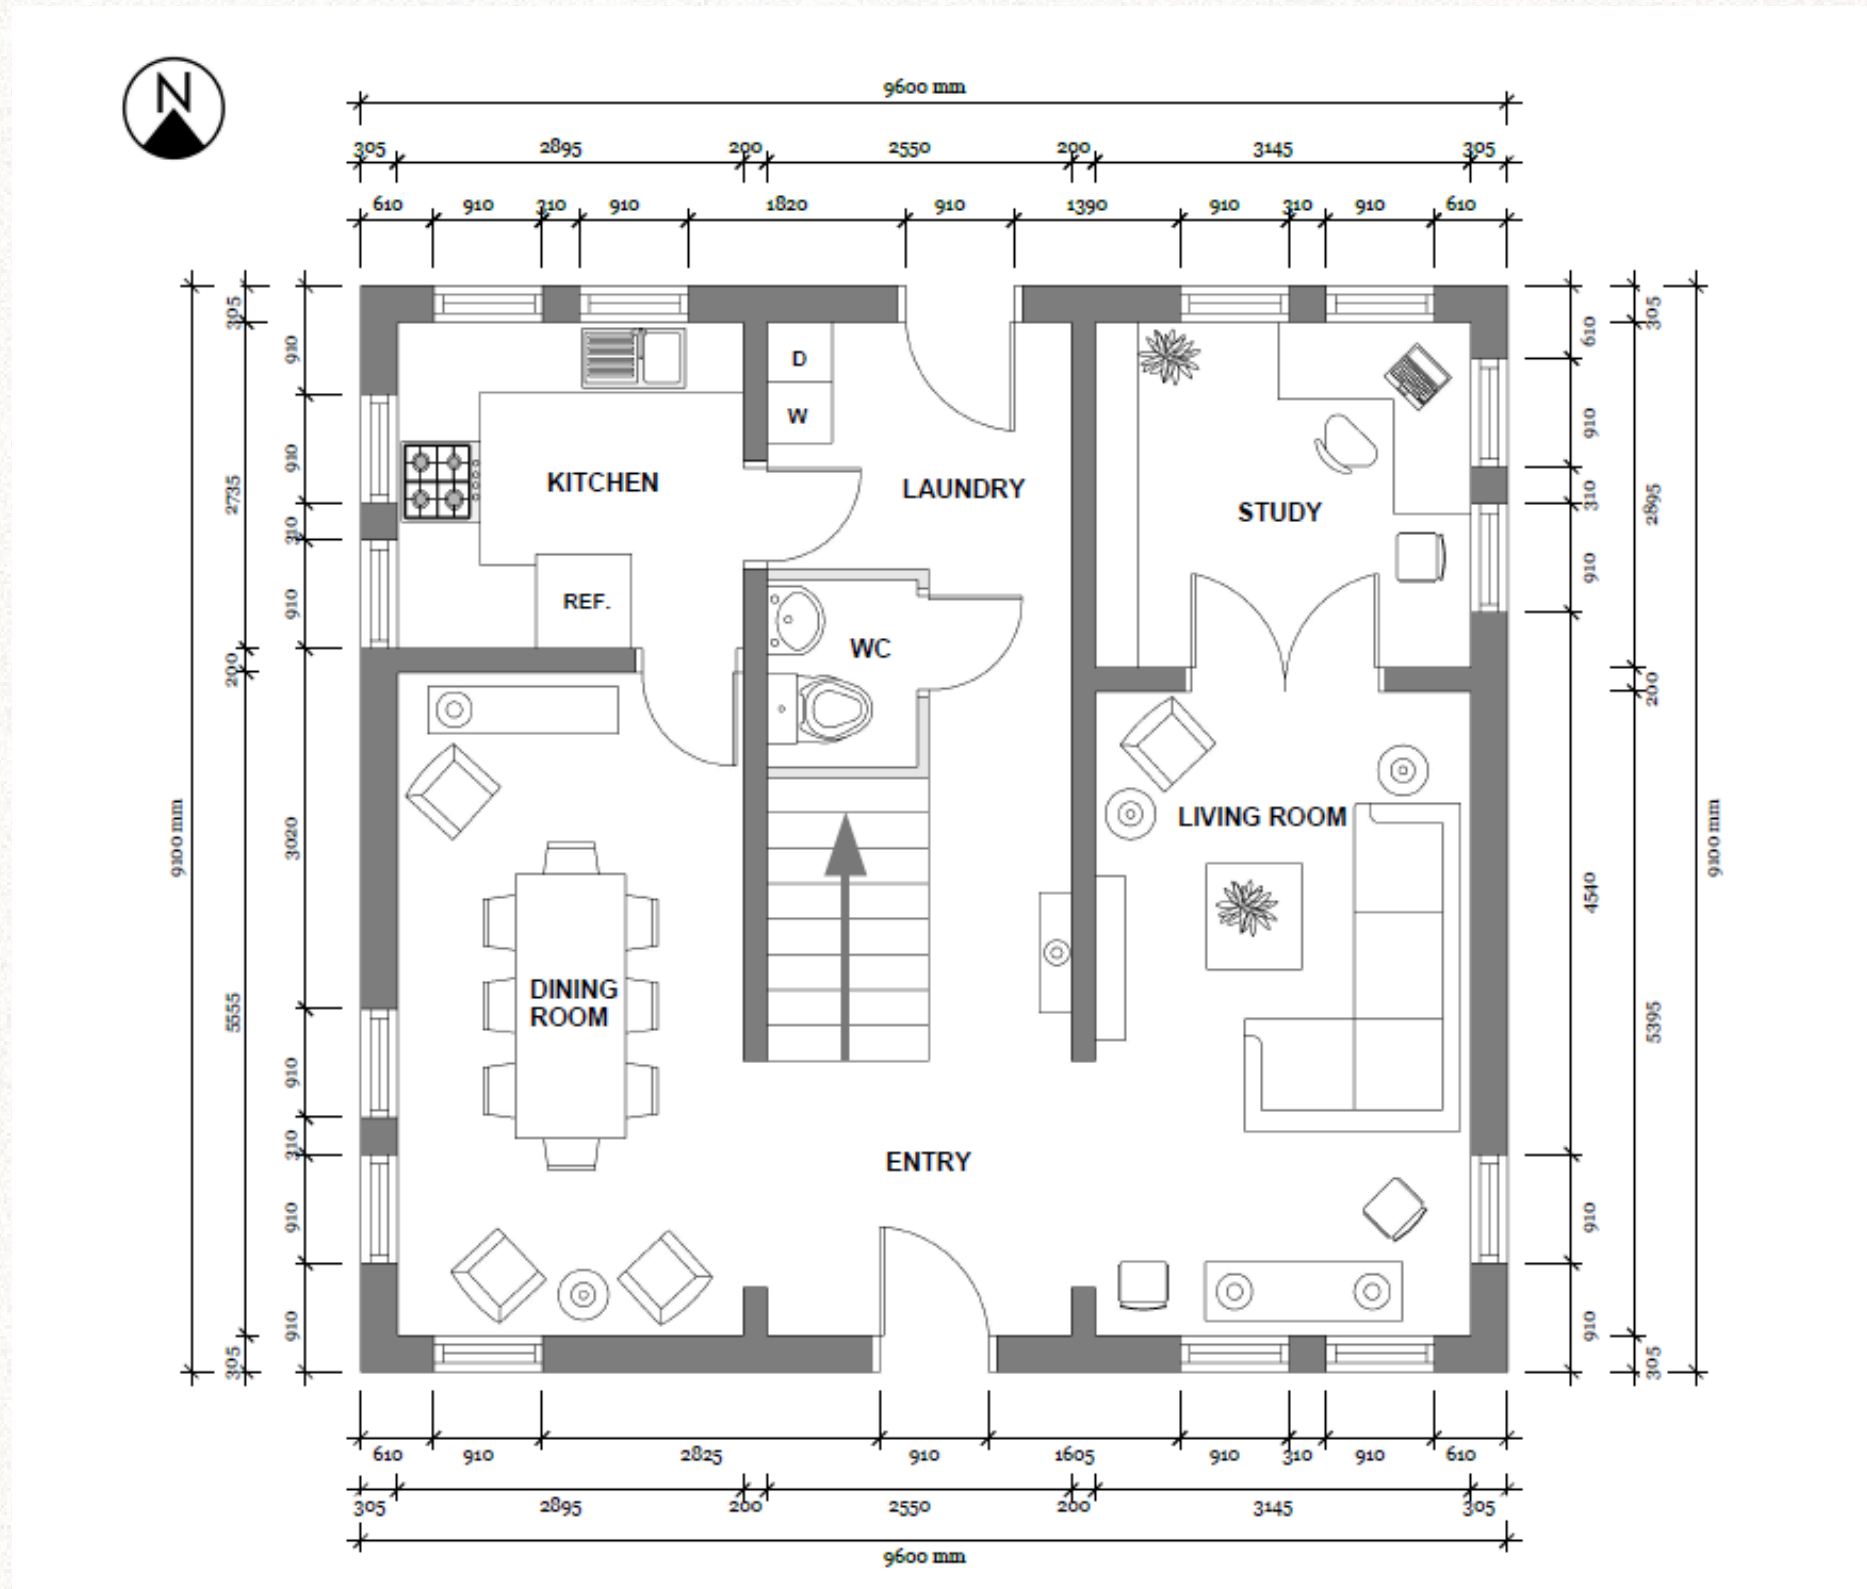

A-Living design philosophy focuses on creating unique, inspiring, and timeless spaces that tell a story while reflecting the individuality of our clients. We prioritize innovation, curiosity, and a client-centric approach, ensuring that each design is personalized and original. By integrating sustainability and social responsibility into our work, we contribute to a healthier and more sustainable future for our clients and the planet.

Our global perspective allows us to draw inspiration from various cultures and traditions, respecting each project's unique context. We celebrate the rich diversity of experiences, memories, and backgrounds that our clients bring to the table. Attention to detail and commitment to craftsmanship are at the core of our design approach, as we believe that the beauty of a space lies in the harmonious union of form and function

our

PROJECTS

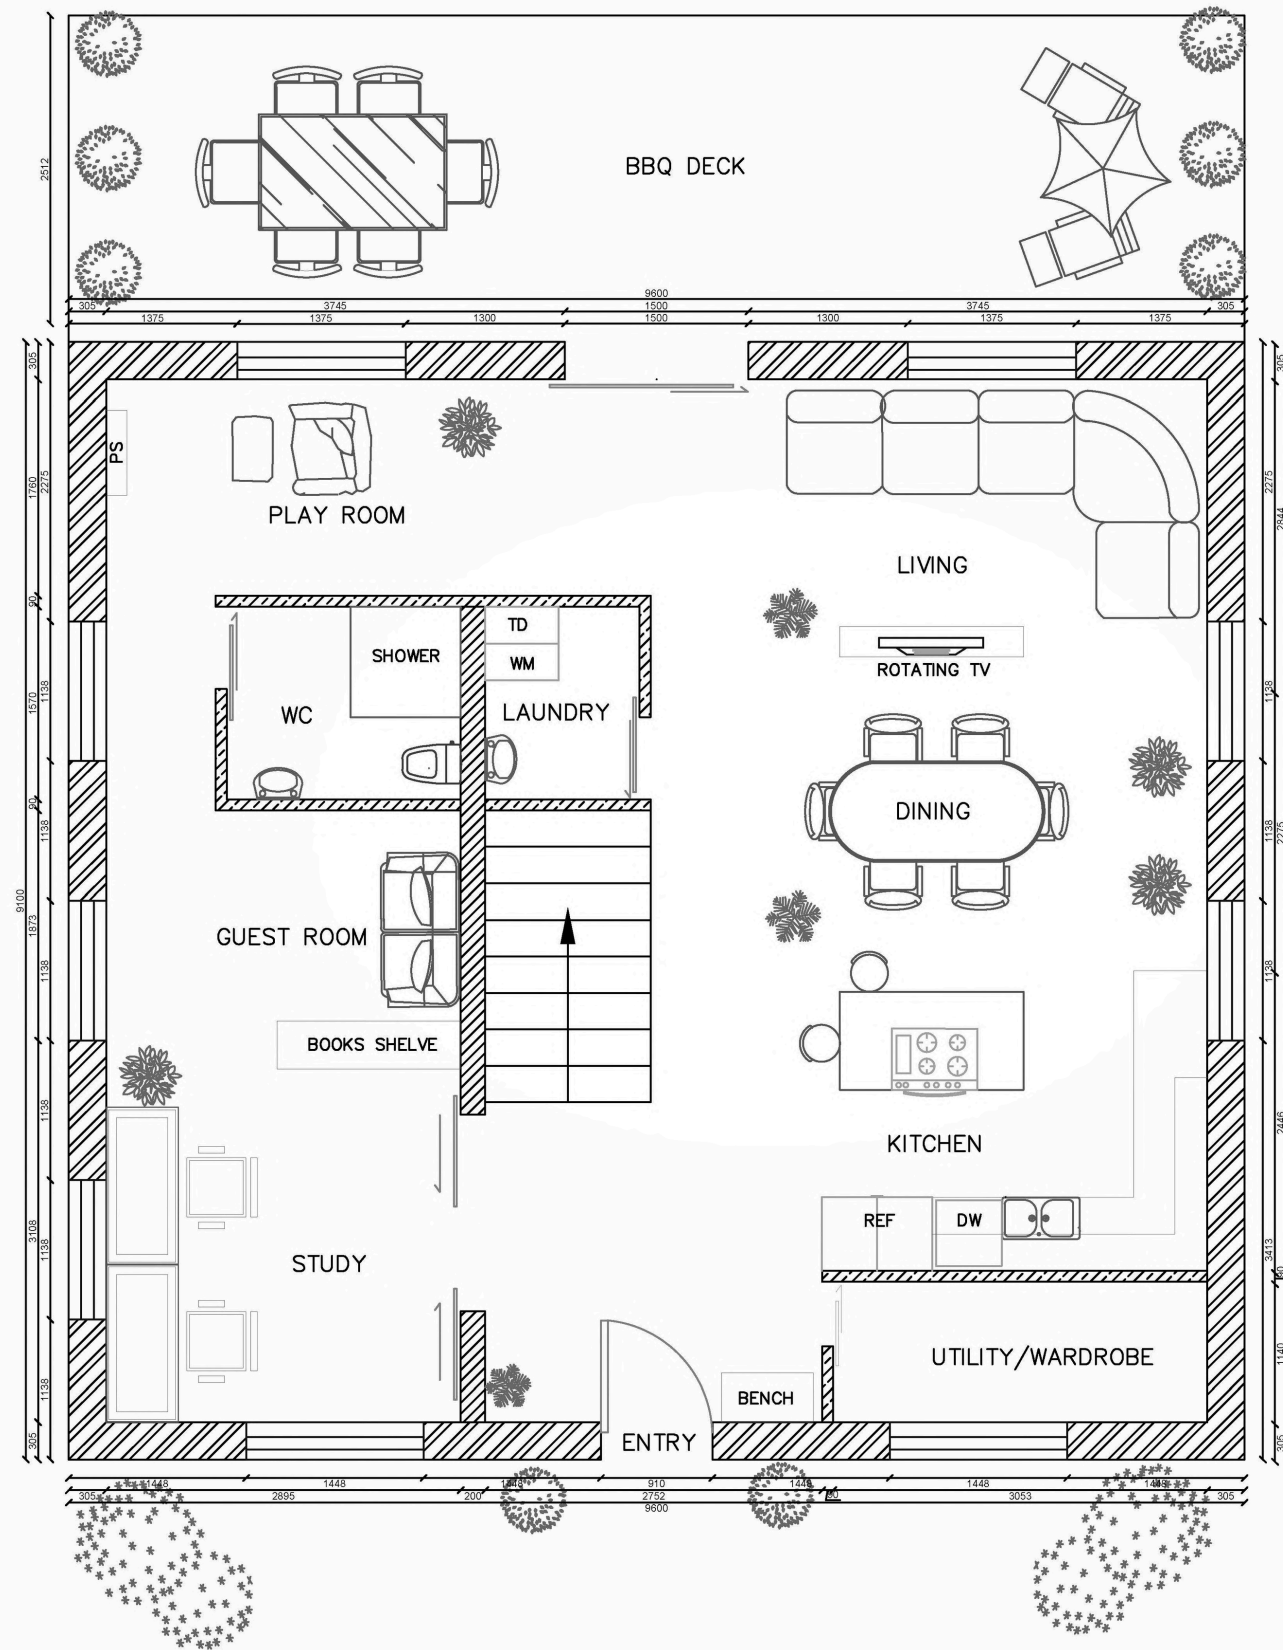

Ground floor Redesign

BRIEF

The client wants to redesign the entire floor of her house built in 1950. The design should be an open plan that incorporates dining, kitchen and living areas. Laundry and study room should be separate. Optional inclusions: bathroom, guest room, utility room.

The design should have a 'wow factor'.

Ground floor Redesign PROPOSAL

Our proposed design has a walk - thru concept, with an open plan design however giving the privacy where it's needed. We made larger windows to increase the natural light and make that perfect cozy and warm atmosphere for the family home.

We created extra space in the northern part of the house as a barbeque deck with a garden and outdoor seating area for family events and dinners.

Proposed Color Scheme

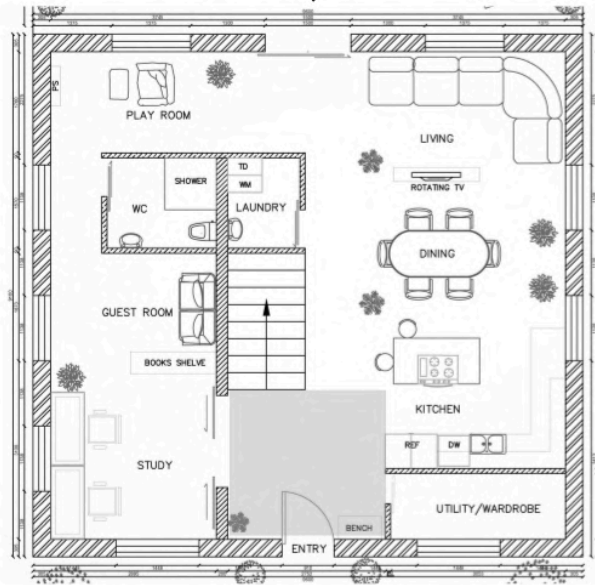

MONOCHROMATIC

The monochromatic colors Blue-Green, Green-Blue & Blue mixed with White and Beige hues and natural wood flooring are proposed for this family home design to give a little bit of coastal feeling yet to create a sophisticated elegant design with expensive décor.

Entry Hall

Sample Board

Schedule
